Susie is a self-taught artist. For a number of years she painted in a studio in the Yarra Valley where she developed her current art practice. She has been a finalist in national competitions, received grants and regularly sells her works. She is committed to empowering learners to connect to their own innate creativity.

WORKSHOP OUTLINE

From the whimsical to the political, come along and experiment with the endless possibilities of the art of collage. For inspiration, Susie will introduce you to a number of artists past and present who have worked with this versatile medium. You will also be guided in how to use various techniques. Bring along old paintings, life drawings, and anything else that you may want to tear up and transform into a new creation. Susie will also bring along all kinds of magazines, maps, music sheets and more for you to play with.

Through various techniques, exercises and by providing a supportive environment, Susie invites beginners to explore their untapped creativity and for more experienced artists to experiment with new ways of creating. The result is greater confidence in your ability to authentically express yourself.

All materials provided including cardboard base and adhesive.

You may also want to bring some of your own specific papers and materials too.
